**FOR IMMEDIATE RELEASE**

**Bionote USA Launches New In-Clinic Hematology Analyzer**

*Vcheck H analyzer offers 6-Diff and reticulocyte analysis*

**BIG LAKE, MINN. (January 6, 2025)** – Bionote USA has expanded its in-clinic diagnostics portfolio with the introduction of the Vcheck H, a high-performance veterinary hematology analyzer designed for rapid, comprehensive CBC analysis.

The Vcheck H provides in-clinic evaluation of white blood cells, red blood cells, platelets, reticulocytes and hemoglobin, delivering 35 reported parameters in 90 seconds or less. The system supports high throughput, processing up to 60 samples per hour for CBC and differential testing and up to 40 samples per hour for CBC, differential and reticulocyte analysis.

The Vcheck H is powered by three advanced testing technologies, including fluorescence flow cytometry, sheath flow impedance and colorimetry, delivering accurate and reliable results through simple single-button operation. Veterinarians also have the flexibility to select either optical or impedance platelet measurement, allowing them to align testing with their preferred methodology and clinical workflow.

“In-clinic hematology testing is essential to delivering high-quality patient care,” said Kalani Inez, director at Bionote USA. “The Vcheck H provides rapid, reliable results that help support timely clinical decisions and improved patient outcomes.”

The Vcheck H represents the latest expansion of the Vcheck diagnostic platform, which includes the Vcheck F series of quantitative in-clinic biomarker analyzers and assays, as well as the Vcheck C1 in-clinic chemistry analyzer launched in October 2025. Together, the Vcheck platform reinforces Bionote’s commitment to delivering fast, accurate and cost-effective diagnostics at the point of care.

For more information on the Vcheck H, visit [www.bionote.com/vcheck-h](http://www.bionote.com/vcheck-h). To learn more about Bionote's other in-clinic analyzers and tests, visit [www.bionote.com/veterinary-products](http://www.bionote.com/veterinary-products).

## **ABOUT BIONOTE USA**

Founded in South Korea, Bionote has a long history of creating diagnostic products. A leading research and development company, Bionote helps both veterinarians and medical professionals worldwide by researching and creating solutions in the diagnostic space. Combining in-clinic and microbiology experiences, Bionote USA was formed to bring diagnostic tools that fulfill best-in-care practice needs to the North American veterinary marketplace. This forward-focused, problem-solving approach to patient care resulted in the development of Vcheck and its premium line of quantitative diagnostic tests which provide an actual numerical result - not positives, negatives or estimates. With thousands of Vcheck analyzers placed in veterinary clinics worldwide, Bionote allows veterinarians treating canine, feline and equine patients to prescribe better care at the point of care.
